SOFTWARE DEVELOPER

Hello, I'm Daniel. I am a professional software engineer with experience in developing various web and Android applications. I have a strong background in scaling products to meet client needs and integrating APIs into both web and mobile platforms, which has helped me gain a solid understanding of common challenges in development. With years of experience in building robust applications, I have successfully navigated a range of technical issues. I am confident that my skills and commitment would make me a valuable asset to your team.

SKILLS

Javascript | HTML | CSS | React | Tailwind | NextJS

Java | Go | Python Django | MySQL | PostgreSQL | SQLite | Firebase

Figma | Adobe XD | Postman

EXPERIENCE

DEVEX - A Quadruple A Construction Company   **August 2023 - Present**
Web Developer

- Created an internal software for productivity and optimization of works. Used by over a hundred employees.
- The software has 3 systems inside of it that is tailored for specific department. Each system(module) has different features and specific use cases.
- When developing this I used: Figma, Next.js 14, React.js with Typescript, Tailwind, PHP Laravel for backend and MySQL for the database.

Thesis: An android based app for maternal health reproductive   **2022 - 2023**
Android Developer

- Features: Video Recommendations containing maternal health videos, Realtime Chat w/ notification for seamless chat and experience, Chatbot for emergency questions with reliable response. Online schedule consultation for hassle free user.
- I received Senior BSCS: SE of the year 2023 award and our thesis awarded as Best Thesis
- I used Java, Firebase, SQLite, Adobe XD, Postman, and GCP

                                                                 March 2022 - May 2022
Fastlane Start-up Company (Intern)
Backend Developer

- Maintain the existing software by developing modularized models and business logic which allowed for easy unit testing.
- Migrating the database from SQLite to PostgreSQL.
- We used Python Django, HTML, CSS(SCSS, Bootstrap), JS
- Maintain Point of Sale and Credit Management for Fastlane client.
